LP-02 Log-periodic antenna 200 MHz to 3 GHz

Main Features

- 200 MHz to 3 GHz frequency range
- Excellent Antenna Factor
- Tripod adapter for easy vertical-horizontal polarization change
- Individual calibration
- Robust, rustproof aluminium construction
- Lightweight

LP-02 is a log-periodic antenna designed for radiated emissions and immunity application.

It can be used in conjunction with any receiver or spectrum analyzer.

Its ideal companion is the EMI Receiver Unit 9030 or 9060 that can be easily mounted on the antenna mast (*).

(*)The direct connection between antenna and PMM Receiver Unit eliminates additional sources of uncertainties due to coaxial cable attenuation and scattering. For further information please consult our brochure "Fully CISPR-Compliant Digital EMC/EMI receivers 10 Hz to 18 GHz".
